

Little Likit Refill

Net weight 8.82oz / 250g

Product Information

Little Likits are glucose based flavored licks designed to be used with the Boredom Buster, Tongue Twister or Boredom Breaker to help relieve boredom and stress. Little Likits can also be fed by hand as a distraction aid.

Top Tips

1. Introduce the Little Likit to your horse slowly, by firstly allowing them to lick the refill from your hand, then from inside the toy. Finally hang the toy and hold steady, they will soon get the idea.
2. Try using different flavors of Little Likit to keep things interesting.
3. For horses that consume Little Likits too quickly, try using just one at a time as this will make the toy more challenging and also ensure they stick within recommended consumption levels.
4. Ensure that your Likit toy is hung/fixed as directed in the instructions. Failure to use correctly will likely result in excess consumption.

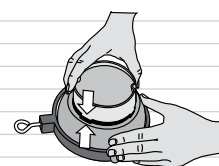

Replacing your Little Likit is easy!
