**MICROCYN® TECHNOLOGY AT WORK**

**BEFORE**

“In August 2015, our team at Port Angeles Pet Posse (a volunteer rescue organization) got a tip from a concerned citizen who had found Hydee, a beautiful Golden Retriever, with numerous medical problems associated with infections, flea infestation, malnourishment and extensive hair loss. We took her in and treated her with the Microcyn® powered spray. Within days, her condition had noticeably improved, and we continued her treatment to help her skin heal. After three and a half months of treatment, her hair had grown back and she is now a beautiful, healthy dog once again.” – Shell-y Van Cleve

**AFTER**

_Treatment Time: 3.5 Months / Therapies Used: Microcyn® Powered Wound & Skin Care Spray_

**DAY 1**

“Airborne Theory (Aka. Theo) is a Thoroughbred/Irish Sport Horse cross that trains and competes in Eventing. While I was out of town (horses love to get into trouble when mom is away), Theo somehow cut his nose open. I had heard good things about Theracyn so I wanted to give it a try. I used Theracyn Wound & Skin Care Spray to clean the wound and then used Theracyn Wound & Skin Care Hydrogel as a protective barrier. I couldn’t be happier with the results! We are now on day 21 and the wound is healing beautifully. My vet was out visiting another patient and was thrilled to see how good Theo’s nose was looking!” – Megan Farkos

_Treatment Time: 21 Days / Therapies Used:_

- **Day 1:** Antibiotic Ointment
- **Day 2-21:** Theracyn™ Wound & Skin Care Spray and Hydrogel
THE CARE THEY NEED. WHEN YOU NEED IT MOST.

When your animal is in need of care, time is of the essence. Introducing Theracyn®, a one-step wound solution, crafted for easy application and rapid results. Now in a convenient spray-on solution, this fast-acting formula is powered by the trusted original Microcyn® Technology that has treated over 10 million human and animal patients. See for yourself what makes Theracyn® the perfect at-home solution for your animal’s urgent medical needs.

- Formula optimized to promote natural healing of cuts, sores, lacerations and irritations
- Proven safe*, no-sting formula
- Veterinarian recommended

WOUND & SKIN CARE

Benefits & Usage:
- Easy-to-use one-step cleanser & wound dressing
- Cleans cuts, sores, lacerations & skin irritations
- Formula promotes natural healing
